How to take screenshot through javascript on android? A: There are a bunch of libraries that do this. I often use I also have found some hacky methods here. You can also use the android-screenshot library. The present invention relates to a motor vehicle apparatus for carrying out a simulated head-on collision and more particularly to the simulation of head-on collisions with a motor vehicle apparatus carried in the trunk of the motor vehicle. It is desirable to simulate a collision of a motor vehicle with another motor vehicle to give the motor vehicle driver a realistic viewpoint with respect to the operation of the motor vehicle. Conventional devices for head-on collisions are limited in their use because of the location of the simulated collision system within the motor vehicle. Recently, there has been considerable interest in transporting a motorcycle in the trunk of a motor vehicle. It is desirable, when transporting a motorcycle in the trunk of a motor vehicle, that the simulation of a collision be carried out so as to simulate a head-on collision against a fixed barrier. In conventional simulated head-on collisions for vehicles, there is no way of simulating a collision against a fixed barrier. The present invention is directed to overcoming one or more of the problems as set forth above bff6bb2d33**

In a camera-shy woman's final form, Elden Lords are the final protector of the world, and unofficially strongest warriors of all time. Taking on the role of a warrior of the ranks, you gather your fellow comrades and they too will become Lords. In the game world, fighting for an ideal, you develop your proficiency in instruments (sword, spear or bow) and gain the most powerful skills possible. In addition to receiving the skills you level up, you are able to customize the whole look of your character.

There's a huge world and a vast world map for exploration. The vast world map is connected seamlessly to the city map, allowing players to seamlessly travel from town to town. Players can also receive quests from NPCs.

Players can share their experience by sharing the maps they've explored and their most well-fear stats with other people.
