Even if you already have a serial key, you can always use the serial key generator to get a new key for a license for an updated or current version.

OS: Windows 7 x64 I was able to successfully use the program to convert videos with an error that went away after I restarted the program. A: Here is the free version of EMICSoft Total Media Converter 3.1.16 Crack [Feature]. Link, which is a.exe for Windows and a Zip for Mac, Mac OS only. Download the.zip, extract, import into IDM (IDM torrent and use one of the generated torrents). Open IDM, go to your download manager, browse for and open the.exe, click add, find the.exe and click add. Click open and the conversion should start. EDIT - If you're having issues installing this.exe just double-click on the.exe and select run/install. Q: jQuery.toggleClass('active') not working I have some code to toggle between elements of the same class but when I click the button it does not always toggle the class and sometimes it doesn't toggle at all. I tried using toggleClass, toggleClass and toggle with no luck.

Here is the code: `$('.btn-submit').click(function(){ $('#save-activity').toggleClass('active', function() { $('#save-activity').toggle(); }); $('#cancel-activity').toggleClass('active', function() { $('#cancel-activity').toggle(); }); });` The button is just a button for now, it might be a form, radio button, or checkbox later. I think the problem is that I'm not toggling the classes and I don't know why. I even tried adding !important to the class attribute as the docs say: Any !important declaration is ignored by the browser. This is in contrast with, for example, using an !important declaration within a style sheet. A: Try with jQuery's.is() method like this: `$('#save-activity').is('.active').toggle(); $('#cancel-activity').is('.active`
