What's new in Football School:

. It's a new new-age OlliOlli, an exciting new odyssey into the surrealism of adventure that's saved by careful planning and the invention of custom mechanisms made to make the gameplay flow at speed. You've hit the nail on the head Olli, it has no reason to exist if the gameplay just does not work, then it's just tryhard and nothing more. Unlike some reviews of this game here, I spent my time with this game up to game "T". This is not a complete test, but a proper experience. Almost 95% of the time was spent playing OlliOlli. After playing the newer triple A titles and getting further into Bethesda, I tried to rack my brain for anything as good that I have played before. The closest thing to "Easure" that came to mind was "Marble Rondo". So you can see that OlliOlli definitely got somewhere and the game is fun in its own fair. Even after being the "Fallout of OlliOlli". There is a great deal of fun and the gameplay is superb. I have to say that this game gets second place in my favorite games of this year. It's definitely a step above the previous OlliOlli games. You can play out a game in probably around 3 hours, maybe even 4 if you plan on playing

every trick in your pocket, and you have all of it. On top of that, you can replay any level, or the entire game if you want. The control mechanics are used perfectly so I don't have to say much about that, it flows perfectly. Now, do I give this game a 10 or a 9.9 or something else. Yes, I give it a 9.9 and only because I didn't get everything I wanted, and a solid 10 was inevitable. In fact, I even wish that the game could have included a few more characters for online challenges, but still a pretty decent game. You start by playing as Olli, you get a new Karma at the start. Other than that your skill level is set to the simple "B" level, which is great. Now you start out on the streets and there's something you have to do before you can even play OlliOlli: The "Get to This" is a good laugh at first before you go into the main screen. In fact, it's essential to keep

The year is 10,000 BC and societies have begun to grow increasingly distinct. A group of people from one village will have to make a decision that will impact their whole life - will they move to the savanna or stay in the woods? How will they interact with their new environment? Are they guided by their spiritual beliefs or are they guided by their personal interests? And what if they have another choice? Which will bring more honor, gold, food or strength to

their family? In Ironcast, you have to make decisions, explore different paths, and build your community to survive the long winter. The game consists of two distinct game-modes: Story Mode, in which players have to decide their future, and Sandbox Mode, where players can freely explore their new world, build whatever they want, and feel the impact of their actions. Features:

- Quickly create your village and get yourself up and running.**
- Go off the beaten track and customize your village to your tastes.**
