“Good start of a long awaited RPG game. It has its own style, has pretty good story, impressive characters and graphics.” - Sam “Final Fantasy Tactics Tactics optimized for mobile look to be a great game, although I’m unsure of the quests and battle system itself. It’s a shame that for the US release, we can’t try it out, but until then, we’ll have to live vicariously through the lovely screenshots.” - Clover/\* Any copyright is dedicated to the Public Domain. \*/

**I've been waiting for this little dynamic because it has almost all the more I play on PC games. It will be it be, so it's sad that you will go away, but that you have enough quality to bring back and share with us still be a great option for serious players. Why isn't the Demo available to play online? Offline it's just fine. I don't want to have to pay for it to play the Demo offline. I would like to make the demo available to play it while I wait for all of the servers to return online. Why should people have to pay for a demo for online play? This is just another way the "internet" is backing it's selves like they always have. The only real way to play this game, is to buy it. Im not happy. I hope yall know what you are doing. If not, stop playing video games. Thanks. I would love to support the development and progress of such a great game such as this. But to be forced to purchase the game to be able to play a demo? And to PLAY online?.....wow. I cannot support such. Perhaps a demo with this being available offline would be a fair way to go. The last demo I played was a long time ago and I don't remember very many details. I just remember enjoying playing it. Yes, I'm aware that there's online component to the game; I also know that there's a free trial component. In my memory, there was a limit of two game sessions per day for the trial period, both of which**
