Now, create your own. Twitter: For for no reason. In. I will. This is the hacked version of Autosplitter. I didn't pay any money for this. lange guilbout de 11  
Inhibition of Na(+)-H+ and Na(+)-K+ cotransport in respiratory smooth muscle: role of two mechanisms at separate sites. In this study the role of the Na(+)-H+ and Na(+)-K+ cotransport mechanisms was examined in the rabbit tracheal smooth muscle by using the membrane potential method. The Na(+)-H+ cotransporter (NHE) activity was inhibited with the ionophore A23187, while inhibition of the Na(+)-K+ cotransporter (NKC) was achieved by clamping the tissue at voltages between -55 and +40 mV with an intracellular high-K+ solution. NHE inhibition by A23187 (10 microM) had no effect on the hyperpolarization induced by 10(-7) M acetylcholine (ACh) and did not alter the residual activity induced by 10(-5) M ACh. NKC inhibition by clamping the membrane potential at -55 mV produced a small decrease
