Hi Lenan, I have installed the software in both versions of Windows 10 on my laptop. So far it seems to be working fine, I will keep it running until I get the better driver. In the mean time I will try to track down another adapter. I am not sure if I had any issue because I installed it on a new computer. I will check my previous work and also check for updates. Keep up the great work. Thank you. Version 18.4.4: .. Fix for AMD Radeon Software (version 17.3+). .. Fix for Windows 10 (version 1803). .. Fix for Ubuntu 18.10. ..
